PROFESSIONAL SUMMARY

Silver medalist, Brazilian Mathematics Olympiad (OBMEP, Top 0.01% of 18M+ participants nationally). Translates extreme analytical rigor to structural incident response in high-stakes production environments. L2/L3 Engineering Support specialist closing 80+ tickets weekly at 95%+ SLA compliance. Expert in PostgreSQL diagnostics and structural failure-class elimination, safeguarding systems where 30 mins downtime risks ~\$15k USD in combined client exposure.

TECHNICAL SKILLS

- **PostgreSQL Diagnostics & Incident Response:** WAL management, replication slots, system catalog internals (`pg_class`, `pg_toast`), bloat analysis, `EXPLAIN ANALYZE` tuning, JIT, `pg_hba` (SCRAM/MD5), `pg_restore -j 4`, PL/pgSQL.
- **Infrastructure Automation:** PowerShell, Python (Pandas/parsing), Bash, SQL, ETL pipeline design, Windows Server Registry/ACL logic, DNS/SMTP/TLS protocol diagnostics, Git.
- **Support Operations:** P1/P2 Incident management, ITIL-aligned RCA, post-mortem documentation, SLA & Churn management, B2B SaaS cross-domain live debugging, technical mentoring.
- **Languages:** English (Certified B2 Full Professional Proficiency, BRASAS), Portuguese (Native).

PROFESSIONAL EXPERIENCE

Pedroso Automação | B2B fiscal compliance ERP SaaS June 2024 – Present
Technical Support Engineer | *L2/L3 Infrastructure Recovery* União da Vitória, PR

Direct L2/L3 support for 500+ corporate environments (1,500+ end-users). Maintained full independence on solo rotations, resolving P1/P2 incidents without escalation through deep structural analysis.

- **Eliminated 100% of WAL-related data losses** by querying `pg_replication_slots` to identify orphaned entries holding WAL segments for decommissioned subscribers; enforced `max_slot_wal_keep_size` as a fleet-wide guardrail.
- **Automated 30-database cluster recovery** by developing a PowerShell script parallelizing state checks, clearing stale `postmaster.pid` files, and monitoring WAL recovery on boot; reduced recovery time from hours to <5 minutes.
- **Diagnosed 1GB/month disk bloat** through `pg_class` and `pg_toast`; traced root cause to encrypted file paths serialized as thousands of characters per audit log entry; reduced restore time 60% (17 min to 6:58) via `pg_restore -j 4`.
- **Engineered 70M-record ETL pipeline** (PL/pgSQL + PowerShell) to process 15GB+ govt dataset; optimized unlogged tables and dynamic SQL to cut processing time 60%, surfacing the top 0.001% of active commercial leads.
- **Resolved silent TLS 1.0 downgrade failures** on Windows 11 by tracing system behavior via Process Monitor; identified application-forced registry keys that overrode system defaults, enabling a permanent code fix within the same week.
- **Delivered zero-data-loss migration of 20-year history** (10,000+ items, 500k BRL stock) by reverse-engineering legacy Firebird DB and replaying transaction changelogs to recalculate state from first principles.
- **Reduced fiscal diagnosis from 30+ min to <5 min** using LLM-assisted SEFAZ XML parsing to trace context-specific NCM, CFOP, and ICMS rejection rules across NFE/CTE/NFS patterns.
- **Established a shared technical knowledge base** and mentoring culture; produced 20+ video guides

and ITIL docs, reducing internal dependency on senior availability and accelerating new engineer onboarding.

Girafa Comunicação Interativa | Digital Agency

Sep 2022 – Apr 2024

Cloud Infrastructure Analyst & Web Operations

Remote, Brazil

Operated Cloud infrastructure and web operations for 70+ corporate clients (AWS Route 53, Registro.br, Locaweb).

- **Served as Vendor Liaison for English-speaking domains** (GoDaddy, AWS, Namecheap), coordinating complex ownership transfers and infrastructure migrations for international clients.
- **Investigated client security breaches** by auditing Git history and access logs; revoked compromised sessions and reset credentials to resolve high-priority security incidents.
- **Resolved high-priority infrastructure incidents** across AWS Route 53, WAF, and email; isolated failure domains during CloudFront cache stalls and DNS propagation conflicts.

EDUCATION & PEDIGREE

FGV — Data Science & Economics (2020–2022)

Rio de Janeiro, Brazil

Full-ride OBMEP scholarship; EDA: 9.71. (Left to pursue hands-on production engineering role).

IFPR — Systems Analysis & Development (2023–2024)

União da Vitória, Brazil

Grade A in Mathematics for Computing. (Left for full-time L2/L3 Engineering position).

Silver Medalist — Brazilian Mathematics Olympiad (OBMEP, 2016)

National

Top 0.01% of 18M+ participants nationally. Bronze Medalist (2014); 2x Honorable Mentions.
